PROJECTS

Swiftery – Logistics Management System

Developed using **MERN Stack**

- Developed a web-based logistics management system to streamline inventory tracking and enhance customer service for logistics businesses.
- Built a responsive, mobile-friendly user interface using HTML5, CSS3, and Bootstrap 5, ensuring accessibility across all devices.
- Implemented real-time inventory tracking and shipment management, allowing businesses to monitor stock levels and delivery status efficiently.
- Designed an intuitive customer portal, enabling users to track orders and receive real-time updates on shipments.

Clone of IMDB Homepage

Implemented using **HTML, Css and JavaScript**

- Designed and developed a fully responsive clone of IMDb's homepage, accurately replicating the original UI/UX design for a seamless user experience.
- Utilized HTML5 and CSS3 for semantic structuring and styling, ensuring fast loading times and efficient code.
- Leveraged Bootstrap 5 to implement a mobile-first, responsive layout, adapting to various screen sizes and devices with smooth breakpoints.
- Created a dynamic navigation bar and interactive elements, mimicking IMDb's user interface with dropdown menus, modals, and hover effects.
